All of the members were present, including Superintendent of Public Instruction John E. Massey, who has been present at none of the meetings here for about three years. Mach business of importance was transacted. On Wednesday morning they had an adjourned meeting in the president's office here. Drs. Kent, Black, and William F. Henderson have been jointly surgeons of the Institute for a number of years. It was deemed advisable to have a surgeon who would always be prosent, and as Dr. Black preferred not to surrender his general practice. Dr. Henderson was unanimously elected surgeon. He is very popular with both faculty and students, and his election gives universal satisfaction.

The indications are that the enteriment of students for next session will be very large. A very significant fact is the number of post-graduate students who will be here. Not only will a large number of our own graduates return, but there are also applications from graduates of other colleges in the State to come and take post-graduate courses in particular lines of work. On Wednesday night a delightful german was given the young ladies by the cadets here. There were present tweive or fourteen couples, and with good music, a charming company, and a superb hall, of course it goes without saying that the whole was charming. THE WATER-WORKS.

A contract has been signed with the Chicago Bridge and Iron Company for building the tower and tank of the new water-works. With the exception of the foundation, this tank will be built entirely of iron, and high enough for a stream of water to be thrown over the tops of the tallest buildings here. With convenient placing of water-plugs and an abundant supply of hose this will afford great relief in case of fire. A force of hands is at present actively

ALLEGHANY ECHOES.

A WEEK OF MOST DECIDED AT-TRACTIONS.

A Handsome Euchre Party-The Regular German and the Dancers-Making the Children Happy-An Unique Entertalnment.

(Correspondence of the Dispatch.)

ALLEGHANY SPRINGS, VA., August 5.-The newspapers of this week, so full of the accounts of the terrible heat, have at least brought peace to the lives of the proprietors of the many resorts, for even chronic grumblers could but appreciate their blessings when reading of the discomforts of those not so fortunate as to be in the mountains. Here, even when the thermometer rose high during the day, with the coming of twilight there has been in the atmosphere a deicious coolness and freshness which made the nights entirely comfortable.

A springs proprietor once said, when being repreached by a lady for having so much rain at his place, "I wouldn't stop it if I could. Idle people must have something to grumble about, and the weather keeps their minds off of other things and gives me a rest."

The great electrical storm of Monday rought coolness and comfort and rebrought coolness and comfort and revived the spirit of gayety which had somewhat flagged during the hot days. The week's amusements were opened by a very handsome eachre party given by Mrs. J. Dreyfuss, of New York, in acknowledgment of the many attentions shown her daughters at Alleghany. Mrs. Dreyfuss received her guests in the ballroom, which had been profusely decorated and presented a very brilliant appearance when filled with ladios in their bright summer attire. There were fifteen tables, their numbers designated by fancy tally-cards of different colors, and these were something new from New York.

BANK STATEMENT.

The weekly statement of the Associated-Banks shows the following changes:
Reserve, decrease, 34,415,400.
Loans, decrease, 33,119,400.
Specie, increase, SI7,200.
Legal tenders, decrease, \$7,175,200.
Deposits, decrease, \$7,70,800.

The banks now hold \$3,400,175 in excess of legal requirements.

The New York Financier this week says: The total holdings of the Clearing-House banks, according to the statement ending August 15, 1896, are 182,248,900. Of this amount name banks alone hold \$53,952,209, or over 45 per cent. In view of this condition, it is not surprising that there is a continued tendency to call in loans, as some of the institutions are below the legal reserve, and the demand for funds from the interior is not diminishing. The excess reserve of the Clearing-House banks is \$4,400,175, or lower than it has been for two years, but when it is recalled that during the corresponding week three years ago the banks were \$22,665,800 under the legal requirements, the immeasurably superior standing at present

called that during the corresponding week three years ago the banks were \$2,045,800 under the legal requirements, the immeasurably superior standing at present will be better understood.

In fact, the bank statement for the current week is unusually logical, and shows the effect of changes that have been going on for over two weeks past. The loss in cash for the week was \$5,55,100, and the contraction in loans was \$1,120,400.

This makes a total item of \$9,977,500, directly affecting deposits, and, as the decrease in the latter tem was \$9,770,800, the statement almost exactly balances. The decrease in loans probably reflects the liquidation enforced through the necessity of replenishing reserves, and the loss in cash, represents the heavy demand on the banks from the interior, which has been a factor in the situation for several weeks past.

A feature of the statement was an increase of \$25,000 in circulation. Of this amount the Fourth National seems to have been responsible for \$546,200 expansion, while the remainder is divided among various banks in smaller amounts.

The decrease in the reserve for the week, owing to operations outlined above, was \$4,45,400.

There seems to be no probability that the statement next week will show re-

was \$4,45,400.

There seems to be no probability that the statement next week will show results much different from those of the current week, and the period of higher money rates will probably continue until automatically adjusted, either by an easing of the situation through domestic measures, or the attraction of foreign money by tempting interest rates. The averages for two years are as fol-

rettes, \$253.45; tobacco, \$1,39.71. Total.

Private sales for week: Wrappers, 45; fillers, 105; dark leaf, 250; Burley, 4; jugs.

48. Total, 481 hogsheads, against 658 hogsheads last week and 377 hogsheads for same week last year.

Revenue collections for week: Cigars and cigarettes, \$13,57,29; tobacco, \$13,-623.33. Total, \$27,189,53.

A somewhat increased demand for and larger sales of desirable fillers is about the only feature of interest in the market this week. Prices remain the same on all grades. We look for good breaks of new brights the coming week.

CHICAGO PRODUCE MARKET CHICAGO PRODUCE MARKET.

CHICAGO, August 15.—Local traders
and scalpers in wheat had no particular
preference for either the short or long
side of the market to-day, but after a
few minutes following the opening appeared to believe that the former would
be the more remunerative, inasmuch as
there was no important reason for expecting an advance. Selling orders, therefore, became more plentiful than buying
ones, and prices edged away to a moderate extent. Cash wheat was steady, September wheat opened at 56., soid between

ones, and prices edged away to a moderate extent. Cash wheat was steady, September wheat opened at 56., soil between 564,604 5-8 and 551-5c., and closed at 56.—unchanged from yesterday.

Corn was governed almost solely by sympathy with wheat, and consequently presented an easier tone during the major portion of the seasion. The proportion of believers in high prices for corn is very small, and at the same time the sentiment in favor of a further decline is not radical, owing to the unremunerative prices at present prevailing. May corn opened at 34.5c. sold between 276.25 5-8c., and closed at 36.78.271.85272.—1-6c. higher than yesterday. Cash corn was steady at about yesterday's ruling prices.

Outs declined through the instrumentality of the weakness conveyed to them by the other markets. The undertone was, however, steady. The condition of the cash market and the belief that the crop will not be fully up to earlier expectations operated to the benefit of prices, which recovered their early loss near the clote. May oats closed 1-4c. higher than yesterday. Cash oats were firm.

Provisions—The hog market was up 169

firm. Provisions—The hog market was up 50 10c. this morning, thereby inspiring the provision trade with some confidence. The opportunity to sell provisions proved alluring, however, and professionals offered freely, causing subsequent weakness and a material loss from the opening point. Before the close a rally took place, "shorts" doing considerable buying. January lard and ribs each 5c, higher, and January lard and ribs each 5c, higher.

The Sun's review: Cotton declined 2 to 4 points, railied, and advanced 3 to 9, but lost part of the improvement, closing quiet and steady at a net advance of 5 points on most months; August advanced 15 points. The sales were 75,699 beles.

Cotton Causcrie—There was a slight decline in prices at the opening, but the loss was quickly recovered, and an advance followed. Liverpool was lower, and the spot sales there were small, while the receipts of new cotton were liberal. But on the other hand bad crop reports continue to be received by the bushel, and there appears to be no let-up to the official weather report showed good rains in the Carolinas and Georgia, but there was no moisture worth speaking of 19-ported in the drought-stricken districts.

It was stated that Nell Brothers would issue a bullish circular, and this report had a stimulating effect on the market to-day. The signal-service predicts continued fair weather, with the excention of possibly local showers on the coast of Alabama. Mississippi, and Louisiana during the next thirty-six hours. The Chronicle's weather report was bullish. The South bought here.
